

# Sprint Review 4

By Kick-In team 3

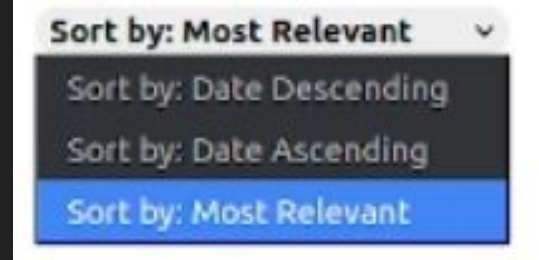

What we did

# Working MVP

- Added sorting by most relevant to files page
- Files preview is now as images
- Search in dutch
- Added admin page
- Admin can create organizations, messages, users, and events
- Ranking of results
- Messages are marked as read for the organization when opened

# Added sorting to files page

Right now we can sort files by most relevant (based on indexing and ranking) and by ascending/descending.

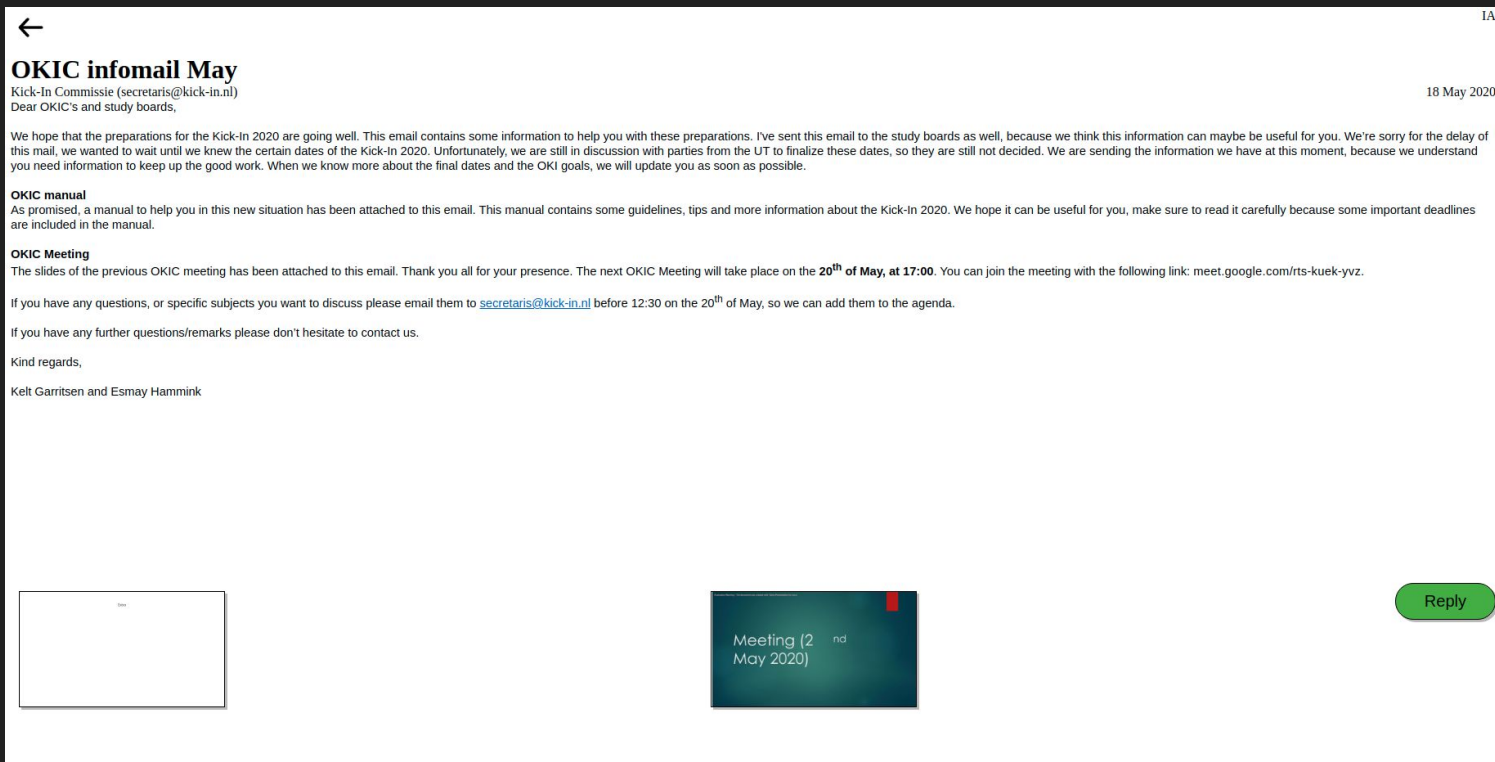

# Files preview is now as images

Files page (shows all the files)

# Files preview is now as images

## Email page

## Search in dutch (language filtering)

By clicking on the Dutch tick box the dutch index will do it's magic and speed up the search for dutch keywords.

# Added admin page

Kick-In administrator page.

Demo

What we are going to do

# Work for this and next sprint

- Show which organizations have opened the message to admin/sender
- Finish responsive design
- Deploy to Previder
